Math Process Log			
The Problem		Challenge Question	
What is the problem asking, in your own words?	Does the problem have any special difficulties, or things to watch out for?	How many steps are involved in this problem?	What will you do to check your work?
What important information is provided?	Will you diagram or graph anything? If so, what?	What should you do first?	How will you know if the answer is correct?
	What math operations will you use?	Then what? Then what?	
How will you answer the special challenge?
